

Supplemental Figure 2

Supplemental Figure 2: **A)** Growth of 4T1 primary tumors after orthotopic implantation of 4T1 tumor cells. Data are mean \pm sem with n=15-21 tumors per data point. **B)** Tumor weight vs spleen weight for individual 4T1 tumor-bearing mice. Open circle is spleen weight of n=6 naive mice **C)** Bromodeoxyuridine (BrdU) labeled S phase cells in spleen and lungs of naive mice or mice 3 weeks after 4T1 tumour implantation. Data are mean \pm sem with n=4 tumors per group; ***p<0.001
