

Table S1. Comprehensive list of PtdIns/PIP kinase genes (and regulatory subunits), PIP phosphatase genes, and genes containing PIP-binding domains that are associated with a monogenic disorder. Only disorders with confirmed (by peer-reviewed literature) or with provisional status on OMIM are listed. Genes with PIP-binding domains were sourced from InterPro.

Table S2. List of Mendelian disorders and list of genes encoding PIP-modulating genes (i.e. PIP kinases, PIP phosphatases, and proteins with PIP-binding domains).
