**eTable 1.** Case-control Analyses.

**eTable 2.** CRP analysis

**eTable 3.** TATA+ Sensitivity Analysis Results

**eFigure.** Distributions of Each Serology Measurement.

This supplementary material has been provided by the authors to give readers additional information about their work.

**eTable 1.** Case-control analyses

Results for each case-control analysis using either logistic regression using seropositive status as the outcome (CMV IgG, Toxo IgG, and CMV+ & Toxo-) or linear regression using z-score or log-transformed z-score as the outcome (CMV IgM, Toxo IgM, and Measles IgG). Standard error (SE) is for either log(OR) or the estimates (Est).

**eTable 3.** TATA+ Sensitivity Analysis Results

The non-TATA+ analysis results were provided for all Toxo-related results. Due to the potential effect TATA+ medications can have on Toxo measurements, we restrict these analyses to cases who are not taking TATA+ medications so that we can remove any potential confounding.

	Outcome	# Control	# Case	OR/Est	SE	p
<b>BD</b>	Toxo IgG	745	935	0.63	0.10	0.004
	CMV+/Toxo-			1.45	0.16	0.0004
	Toxo IgM			-0.05	0.10	0.018
