

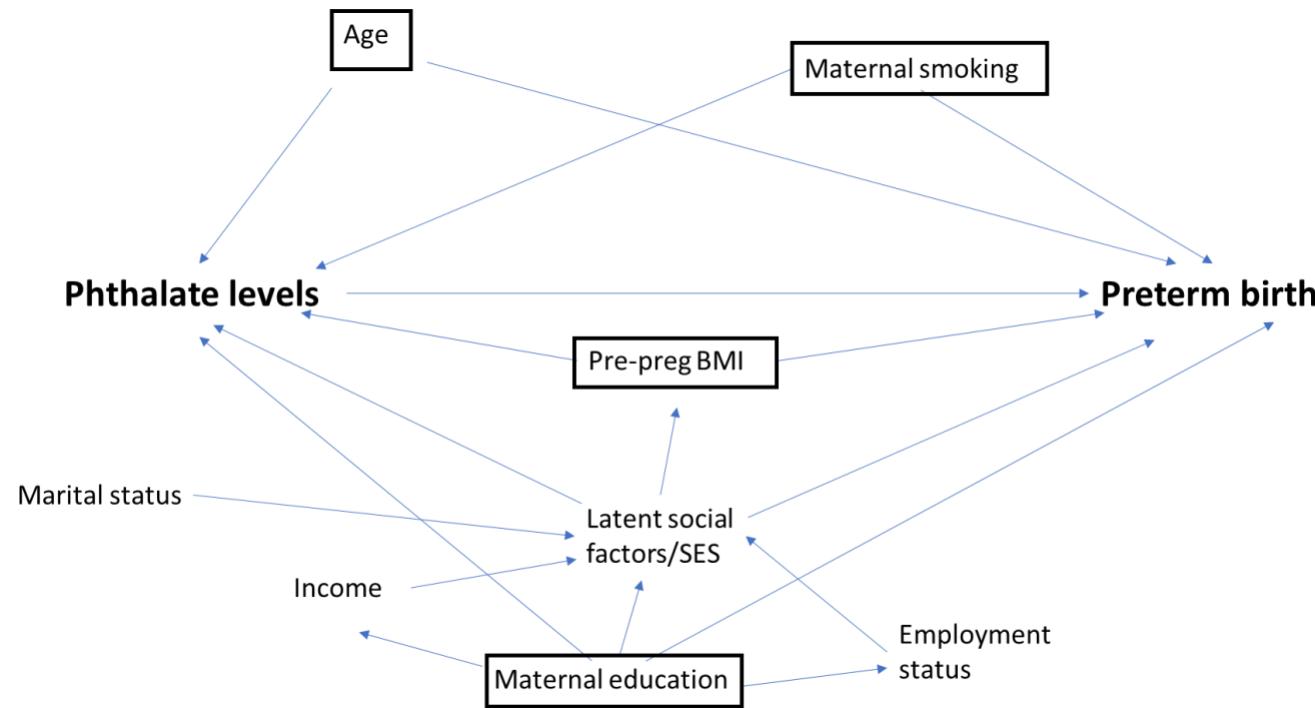

**Figure S1.** Directed acyclic graph of potential confounders in the analysis of prenatal urinary phthalate metabolites and preterm birth.

Note: Variables with boxes around them indicate variables on open backdoor paths that were further considered as confounders in our data.

**Table S1.** Pearson correlation coefficients between specific gravity-corrected pregnancy averages of urinary phthalate and phthalate alternative metabolites.

<sup>a</sup>Pregnancy averages are corrected for urinary specific gravity and models are additionally adjusted for maternal age (continuous) and education (4 level ordinal variable), and year of birth (nominal). Models for individual visits 1-3 include uncorrected phthalate or phthalate alternative metabolites and are additionally adjusted for gestational age at urine sample collection and specific gravity. Associations with p value <0.05 are bolded. Median (range) gestational age in weeks at sample collection by visit was as follows: visit 1=17.6 (16.6, 19.3); visit 2=23.4 (22.0, 25.1); visit 3=27.6 (25.9, 30.3). Abbreviations: diethyl phthalate (DEP); dibutyl phthalate (DBP); benzylbutyl phthalate (BzBP); diisobutyl phthalate (DiBP); di(2-ethylhexyl) phthalate (DEHP); di-n-octyl phthalate (DNOP); diisononyl phthalate (DiNP); di-2-ethyl terephthalate (DEHTP); monoethyl phthalate (MEP); mono-n-butyl phthalate (MBP); monobenzyl phthalate (MBzP); mono-isobutyl phthalate (MiBP); mono-3-carboxypropyl phthalate (MCPP); mono carboxyisooctyl phthalate (MCOP); mono carboxyisononyl phthalate (MCNP); mono-3-hydroxybutyl phthalate (MHBP); mono-2-hydroxyisobutyl phthalate (MHiBP); mono-2-ethyl-5-carboxypentyl terephthalate (MECPTP); mono-2-ethylhydroxyhexyl terephthalate (MEHHTP); 4-methyl-7-oxo-octyl phthalate (MONP).
