

Cathepsin L secretion by host and neoplastic cells potentiates invasion

SUPPLEMENTARY MATERIALS FIGURE

Supplementary Figure 1: IL-4 upregulates the expression of M2-associated gene products. Raw264.7 macrophages were stimulated with 10 ng/mL IL-4 for 48 h. Relative mRNA expression for (A) MRC-1, (B) IL-10, and (C) FIZZ1 was analyzed by semi-quantitative RT-PCR.
