Supplemental Table II. Diagnostic codes used to identify postpartum admissions for stroke	
Ischemic stroke	433.01, 433.10, 433.11, 433.21, 433.31, 433.81, 433.91, 434.00, 434.01, 434.11, 434.91, 436
Subarachnoid hemorrhage	430, 430.0, 430.00
Intracerebral hemorrhage	431, 431.0, 431.00
Acute cerebrovascular disease in the puerperium	674.0, 674.01, 674.03, 674.04
The above codes in any diagnostic position in a readmission after delivery were included in the outcome of all postpartum stroke. Traumatic intracerebral or subarachnoid hemorrhage, subdural hematoma, transient ischemic attack, and cerebral venous sinus thrombosis were not included.
