Figure S1. Impact of the galenic form (suspension or tablet) on plasma posaconazole trough concentrations (POS C_{\min}). A) POS C_{\min} during treatment by suspension or tablet in the whole population; B) mean POS C_{\min} for each galenic form in seven switched patients.

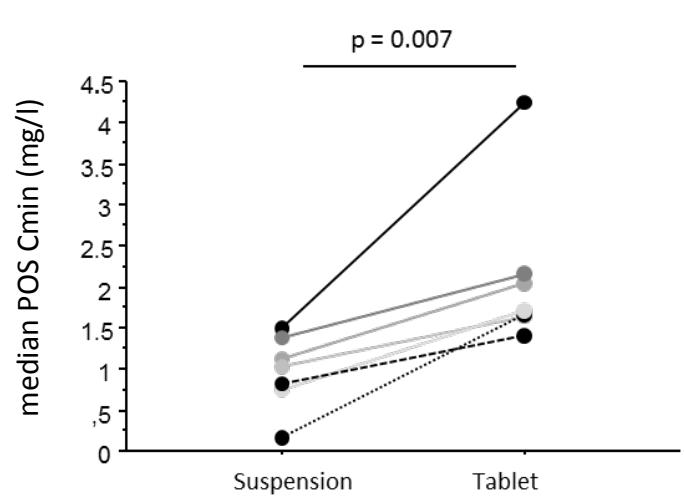

Figure S2. Impact of diarrhea on posaconazole trough concentrations (POS C_{min}) during treatment by posaconazole. Each point represents one POS-C_{min} measure and horizontal lines indicate median
