

1 **SUPPLEMENTARY MATERIAL**

2 Of the tumors irradiated with 10Gy, 3 out of 5 mice in the 10Gy 50% group and 2 out of 5
3 mice in the 10Gy 100% groups showed a complete response and 1 out of 5 mice in the
4 20Gy 50% irradiated groups showed a complete response (supp. fig. S2). The absence
5 of residual cancer cells in the responding mice was confirmed by pathological analysis of
6 the mammary glands. Mice in the 20Gy 100% group died early in the experiment due to
7 GI toxicity.

8
9 No significant change in CD4⁺ cell infiltration was observed at the examined time points
10 (supp. fig. S3).

11
12 Examination of granulocytes, monocytes, macrophages and dendritic cells in the tumors
13 and draining LNs by flow cytometry did not show any significant changes in these
14 populations or their activation status 1 or 7 days after RT (supp. fig. S5). While these data
15 show that there are no changes in these populations after RT at the time points tested,
16 we cannot rule out their role in the priming and activation of the immune response.

17 No significant changes were observed in adhesion molecules VCAM, E-selectin and P-
18 selectin in the non-irradiated parts of the tumor (sup. fig. S6 A,B,C). Blocking E-selectin
19 did not affect the response of the 50% irradiated tumors (supp. fig. S6D).

Supplementary figure S7 – 67NR orthotopic mammary tumors were hemi-irradiated when the upper part of the tumor was in the irradiation field, unlike other experiments where usually the lower part was irradiated. This change in setup did not affect the response of the hemi-irradiated tumors compared to fully irradiated.

1 **SUMMARY OF STATISTICAL ANALYSIS**

2 **Figure 1**

3 Fig1A: Comparison of slopes (trend) between treatment groups

Comparison	Treatment 1 [Median (IQR), Mean (SD)]	Treatment 2 [Median (IQR), Mean (SD)]	P value
No RT vs. 10Gy 50%	No RT: 38.36 (12.13), 32.74 (18.2)	10Gy 50%: -1.88 (5.12), 6.59 (17.72)	0.03
No RT vs. 10Gy 100%	No RT: 38.36 (12.13), 32.74 (18.2)	10Gy 100%: 4.87 (8.4), 6.2 (10.21)	0.06
No RT vs. 15Gy 50%	No RT: 38.36 (12.13), 32.74 (18.2)	15Gy 50%: 10.66 (10.95), 14.82 (13.11)	0.15
No RT vs. 15Gy 100%	No RT: 38.36 (12.13), 32.74 (18.2)	15Gy 100%: 5.74 (23.88), 9.33 (13.21)	0.06
No RT vs. 20Gy 50%	No RT: 38.36 (12.13), 32.74 (18.2)	20Gy 50%: 8.39 (5.95), 9.33 (8.29)	0.1
No RT vs. 20Gy 100%	No RT: 38.36 (12.13), 32.74 (18.2)	20Gy 100%: -5.88 (8.88), -9.01 (8.89)	0.008
10Gy 50% vs. 10Gy 100%	10Gy 50%: -1.88 (5.12), 6.59 (17.72)	10Gy 100%: 4.87 (8.4), 6.2 (10.21)	0.42
10Gy 50% vs. 15Gy 50%	10Gy 50%: -1.88 (5.12), 6.59 (17.72)	15Gy 50%: 10.66 (10.95), 14.82 (13.11)	0.22
10Gy 50% vs. 20Gy 50%	10Gy 50%: -1.88 (5.12), 6.59 (17.72)	20Gy 50%: 8.39 (5.95), 9.33 (8.29)	0.22
10Gy 100% vs. 15Gy 100%	10Gy 100%: 4.87 (8.4), 6.2 (10.21)	15Gy 100%: 5.74 (23.88), 9.33 (13.21)	1
10Gy 100% vs. 20Gy 100%	10Gy 100%: 4.87 (8.4), 6.2 (10.21)	20Gy 100%: -5.88 (8.88), -9.01 (8.89)	0.03

5 **Remarks:**

6 Slope was estimated based on all available measurements for each animal (the maximal measurements
7 from 9 to 122 days post RT) for Fig 1A (Tumor Vol), as well as for measurements for Fig 1B, 2D, 3C, 5A,
8 5B, and 5C.
