SUPPLEMENTARY TABLE S1. SOCIODEMOGRAPHIC AND CLINICAL CHARACTERISTICS OF THOSE WHO
ENROLLED VERSUS THOSE WHO DID NOT ENROLL

	Enrolled in cohort N=141	Did not enroll N=57	
	% or mean (SD)	% or mean (SD)	p
Age	59.7 (15.1)	64.2 (12.3)	0.06
Female	64.9	60.0	0.54
Race/ethnicity			0.63
Non-Hispanic White	50.4	52.2	
Non-Hispanic Black	28.4	19.6	
Hispanic	6.3	8.7	
Asian/Multi/Other	15.0	19.6	
Education			0.0002
<HS Diploma	12.8	31.0	
HS Diploma or GED	48.7	61.9	
>HS Diploma	38.5	7.1	
Insurance			0.14
Commercial	29.5	41.8	
Medicare	11.5	7.3	
Medicaid	50.4	36.4	
Self-Pay	8.6	14.6	
Primary Language			0.04
English	90.6	91.3	
Spanish	7.1	0.0	
Other	2.3	8.7	
Charlson comorbidity score	3.60 (2.8)	3.7 (2.7)	0.86
Body mass index	31.5 (7.9)	28.0 (6.3)	0.02
History of hypertension	44.7	49.1	0.57
History of diabetes mellitus	21.3	26.3	0.44
History of coronary heart disease	15.6	21.1	0.36
History of congestive heart failure	5.0	10.5	0.15
History of depression	19.9	10.5	0.11

Of those who reported health-related social needs, 'enrolled' represents those who enrolled in the linkage intervention, and 'did not enroll' represents those who chose not to participate in the intervention.

GED, general equivalency diploma; HS, high school; SD, standard deviation.
