

Table S1. Odds ratio's for intrapartum/neonatal mortality and adverse neonatal outcome in infants born at 37 weeks gestational age compared to infants born at 39-41 weeks (infants born with breech presentation excluded)

		Odds ratio	95% CI	
intrapartum/neonatal mortality	Crude	1.90	1.43	2.52
	Adjusted*1	1.88	1.41	2.50
	Adjusted*2	1.87	1.39	2.51
Adverse neonatal outcome	Crude	1.74	1.63	1.86
	Adjusted*1	1.68	1.57	1.79
	Adjusted*2	1.57	1.47	1.68

*1 Adjusted for parity, maternal age, ethnicity, socio-economic status, gender

*2 Adjusted for parity, maternal age, ethnicity, socio-economic status, gender, SGA, hypertensive disorder

CI= confidence interval
