

Table S2. Intrapartum/neonatal mortality and adverse neonatal outcome in infants born at 38 weeks gestational age compared to infants born at 39-41 weeks

	38 weeks		39-41 weeks		
	n	‰	n	‰	p-value
all births	124,788		574,781		
ante-partum deaths	175		432	-	
alive at start of labour	124,613		574,349		
Intrapartum deaths	24	0.19	110	0.19	0.98
live births	124,589		574,239		
neonatal mortality	57	0.46	226	0.39	0.31
Intrapartum/neonatal mortality	81	0.65	336	0.59	0.39
Apgar <7	1191	9.6	5763	10.04	0.12
admission NICU ≥ 24 hours [#]	541	4.3	1791	3.12	<0.0001
adverse neonatal outcome ^{&}	1611	12.9	6912	12.04	0.009

[#] admission to 3rd level neonatal intensive care unit with ≥ 24 hours stay

[&] neonatal mortality, and/or Apgar <7, and/or NICU admission (therefore the figure does not add up)
