Missing	14	3	0.2	1	0.1	3	0.2

*The total N is greater than the sum of the N in intervals when not housed, partly housed, and housed due to missing data for some intervals. We classified housing status as housed if stably housed on 100% of days, partly housed if stably housed on >0% to

<100% of days, and not housed if stably housed on 0% of days in each interval. †Rate per 100 90-day intervals. ‡These occurrence categories are not mutually exclusive, with 56 occurrences related to both mental health assessment and suicidality and 4 occurrences related to both suicidality and victimization.
