

Fig. S7. Induction of IL-6 expression in B cells requires the noncanonical NF- κ B pathway. **a,b** qRT-PCR (**a**) and ELISA (**b**) analyses of IL-6 expression in wildtype (WT) or *Nfkb2*^{lym1/+} splenic B cells that were either not treated (-) or stimulated (+) with the indicated inducers. **c,d** qRT-PCR (**c**) and ELISA (**d**) analysis of IL-6 expression in wildtype splenic B cells that were stimulated (+) with the indicated inducers either in the absence (-) or presence (+) of small molecule inhibitor of NIK (NIK_i, 5 μ M)
