

## Supplementary information, Figure S7

**Fig. S7** IFVII degrades the LPS from XDR strains *P. aeruginosa* PA4 (**a**) and *A. baumannii* Ab3 (**b**). Ten micrograms of *P. aeruginosa* PA4 LPS or *A. baumannii* Ab3 LPS was treated at 37 °C for 2 h per reaction; the dose of protein was increased as indicated. Separated LPS samples on Tricine-SDS-PAGE were examined by silver staining.
