

**Supplementary information, Table S6 Comparisons of the case fatality rates tested at admission in nifedipine-treated group with those in general SFTS group or in non-nifedipine group.**

	Nifedipine-treated group (n=83)	General SFTS group (n=249)	Non-nifedipine group (n=48)	<i>P</i> <sup>a</sup>	<i>P</i> <sup>b</sup>
Case fatality rate, %	3 (3.6)	49 (19.7)	10 (20.8)	<0.001	<0.001
Case fatality rate based on stratification of viral load, log <sub>10</sub> copies/ml					
<6	1/26 (3.8)	2/50 (4.0)	0/10 (0)	1.000	1.000
≥6	1/41 (2.4)	38/131 (29.0)	10/29 (34.5)	<0.001	<0.001

<sup>a</sup>indicates difference between nifedipine-treated group and general SFTS group;

<sup>b</sup>indicates difference between nifedipine-treated group and non-nifedipine group.
