

Supplementary Data

SUPPLEMENTARY FIG. S1. MDAs of the top variables from each modality in analysis 1. For visibility, only the top 20 features from each modality are shown. (A) aMRI; (B) DWI; (C) fcMRI. aMRI, anatomical magnetic resonance imaging; DWI, diffusion weighted imaging; fcMRI, functional connectivity MRI; LH left hemisphere; MDA, mean decrease in accuracy; RH, right hemisphere; WM, white matter.

SUPPLEMENTARY FIG. S2. Percentage of participations in the top 100 fcMRI variables by functional network (using network assignments from the study by Power et al., 2011).
