

Supplementary Data

SUPPLEMENTARY FIG. S1. Representative images showing no effects of DMSO and drug treatments (efavirenz and rifampicin) on HepaRG cell morphology after 24 h at 20× magnification. (A) HepaRG cells treated with 0.02% DMSO; (B) HepaRG cells exposed to efavirenz (6.4 μM); (C) HepaRG cells exposed to rifampicin (24.4 μM). DMSO, dimethyl sulfoxide.
