Title: Sharing interoperable workflow provenance: A review of best practices and their practical application in CWLProv

Version: Revision 1 **Date: 6/24/2019**

Reviewer name: Alban Gaignard

Reviewer Comments to Author:

I thank the authors for taking into account all the requested / highlighted needs for clarification. I particularly appreciated the graphical clustering or requirements, the box describing the BagIt approach, the bridges with Linked Data efforts as well as the quality of the discussion and future works section.

The response to reviewers is concise and appropriate.

In conclusion, a very nice research work, supported with consequent software development efforts. This work opens very interesting perspectives towards better reuse, transparency, etc. in data driven sciences.
