

Supplementary Table S1. Landmarks used in morphometric body shape analysis.

Landmarks	
1	Tip of snout/rostral edge of premaxilla
2	Posterior tip of supraoccipital crest
3	Dorsal insertion of the caudal fin
4	Ventral insertion of the caudal fin
5	Point of maximum curvature on the most ventral branchiostegal ray
Semi-landmarks	
ventral outline of the head connecting Landmark #1 and #5, n=8	
dorsal outline of the head connecting Landmark #1 and #2, n=8	
dorsal edge of the body connecting Landmark #2 and #3, n=18
