

Unraveling oxidative stress response in the cestode parasite *Echinococcus*

granulosus. Martín Cancela, Jéssica A. Paes, Hercules Moura, John R. Barr, Arnaldo

Zaha and Henrique B. Ferreira.

Supplementary figure 1. Protein profile of PSCs incubated with H₂O₂. PSCs from two independent cysts (biological replicates Cyst 1 and Cyst 2) were incubated in RPMI plus 10% FBS (0) and with 2.5 mM H₂O₂ (2.5) for 2 h. PSCs were then washed and processed as described in the Material and Methods section. Proteins were resolved by 12% SDS-PAGE and stained with CBB-R250. MW, molecular weight marker; 0, PSCs incubated 2 h without H₂O₂; 2.5, PSC incubated 2 h with 2.5 mM H₂O₂.
