Fig. S2: Body temperature curves of $rlde_{Ssuis}$ -vaccinated piglets after experimental infection with *S. suis cps9* strain 16085/3b

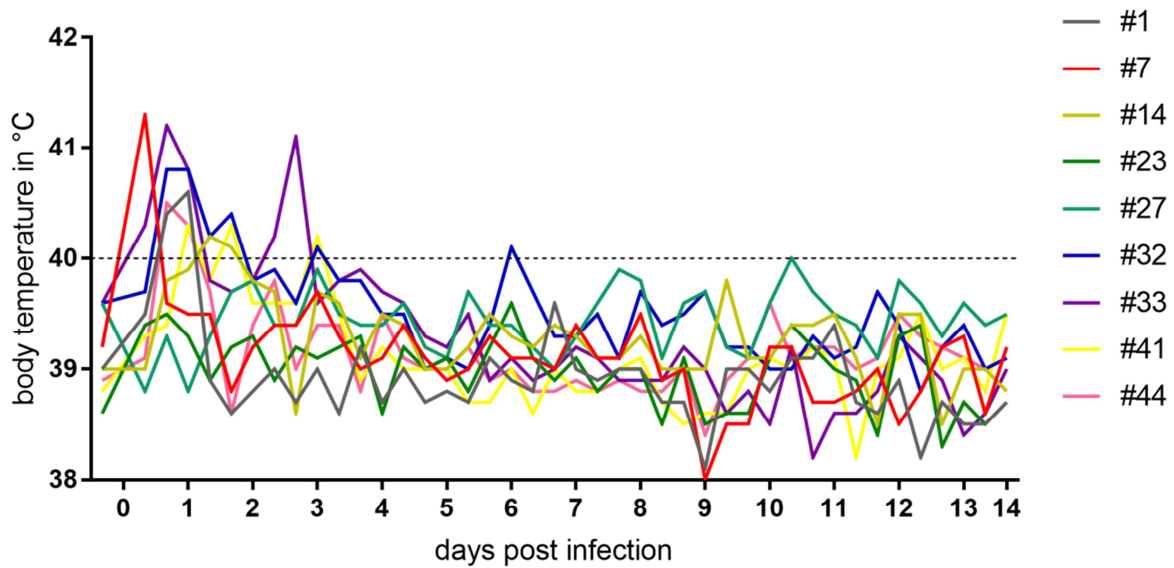

Fig. S2: Experimental infection with *S. suis cps9* strain 16085/3b leads to short-time fever in vaccinated piglets. Body temperatures were measured three times daily, i.e. every 8 hours following challenge. Temperatures $>40.0^{\circ}\text{C}$ were classified as fever.
