

A dataset on the effect of exercise-conditioned human sera in three-dimensional breast cancer cell culture

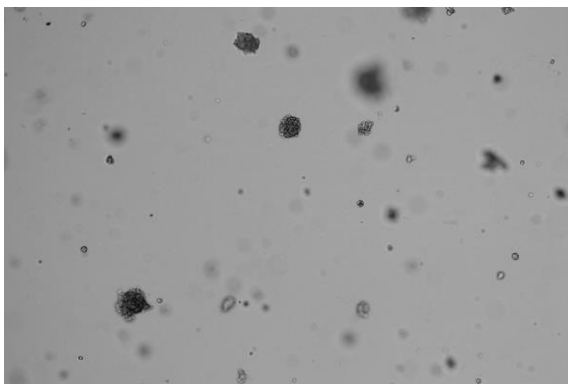

Mauro De Santi, Giulia Baldelli, Francesco Lucertini, Valentina Natalucci, Giorgio Brandi, Elena Barbieri

Supplementary information

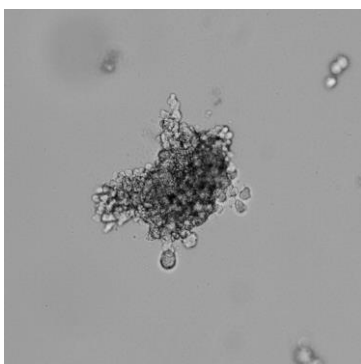

Explicative images of three-dimensional in vitro culture in soft agar. Cells (1×10^3) were cultured in the central layer of agar (0.3% agar) for 18 days and stained with 0.01% crystal violet.
