## File list (files found within DataS2.zip)

```
DataS2_MetaAnalysisDatabase.csv  
RCodeS2_MetaAnalysis.R
```

## Description

DataS2\_MetaAnalysisDatabase.csv - CSV file with database used in all meta-analyses. Each entry describes a single case, and each case includes all covariates

used in meta-analytic models. Effect size Fisher's  $z$  and the variance of  $z$  are listed in the final two columns. See Table 1 for details about the covariates.

`RCodeS2_MetaAnalysis.R` – R code used to run all analyses.
