Tsai. Reactions to Multiple Ascending Doses of the Microtubule Stabilizer TPI-287 in Patients With Alzheimer Disease, Progressive Supranuclear Palsy, and Corticobasal Syndrome. *JAMA Neurol.* Published November 11, 2019. 10.1001/jamaneurol.2019.3812

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: adam.boxer@ucsf.edu

When available: With publication

Supporting Documents

Document types: None

Additional Information

Who can access the data: researchers whose proposed use of the data has been approved

Types of analyses: biomarker development, imaging analyses

Mechanisms of data availability: after approval of a proposal
