

## S2 Fig . Effect of miR-200c expression on mRNA levels of a set of transcription factors A

Analysis of different potential transcription factors for FLNA was performed after miR-200c induction. The graphs show the RT-qPCR results at different time points, with no consistent effect for any factor but JUN. \*:  $p \leq 0.05$  ; \*\*\*\*:  $p \leq 0.0001$
