

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Summary of proteins identified by tandem affinity purification of Tti2. Shown are results of LC-MS/MS analyses of total protein mixtures from purification eluates. 'Mean FC (Log2)' numbers indicate the Log2 of the ratio [LFQ intensity in Tti2-TAP]/[LFQ intensity in no-TAP controls], averaged from four independent replicates. 'q value' numbers were calculated using a 1% permutation-based false discovery rate (FDR) in a two-tailed Student's t-test.
