

S4 Appendix - Mean estimates of total numbers of CHC cases and undiagnosed CHC cases.

Estimated mean total number of CHC cases in Canada, 1999-2013, by birth cohort			
Year	Birth years < 1945	1945 ≤ Birth years ≤ 1964	Birth years > 1964
1999	54341	145367	31916
2000	50057	139972	34196
2001	48098	138876	37949
2002	46123	137389	41797
2003	44120	135555	45727
2004	42127	133401	49739
2005	40164	130965	53834
2006	38192	128276	58085
2007	36236	125374	62420
2008	34311	122288	66832
2009	32434	119051	71327
2010	30626	115689	75898
2011	28854	112234	80642
2012	27134	108712	85459
2013	25472	105143	90337

Estimated mean total number of undiagnosed CHC cases in Canada, 1999-2013, by birth cohort			
Year	Birth years < 1945	1945 ≤ Birth years ≤ 1964	Birth years > 1964
1999	34988	118845	24310
2000	31003	107681	22494
2001	27526	97345	21355
2002	24464	87676	20677
2003	21752	78646	20365
2004	19360	70233	20358
2005	17251	62423	20606
2006	15369	55200	21097
2007	13694	48551	21773
2008	12202	42461	22610
2009	10875	36917	23593
2010	9701	31901	24708
2011	8650	27395	25971
2012	7711	23376	27345
2013	6875	19818	28824
