

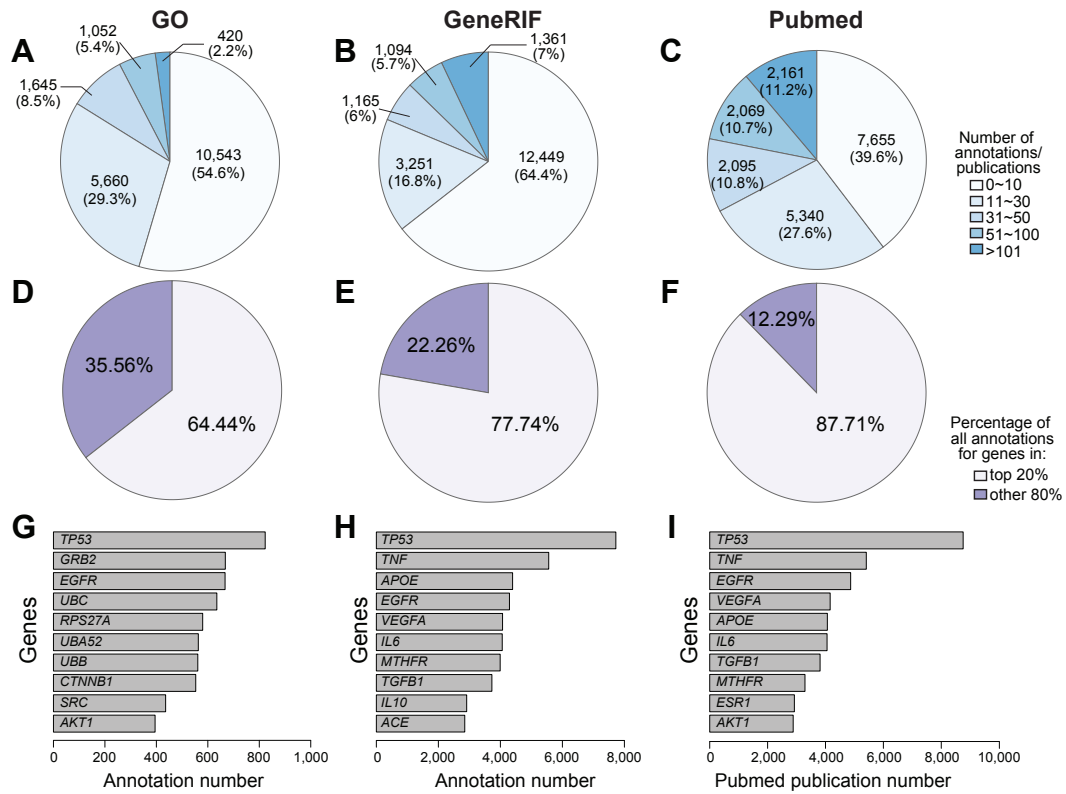

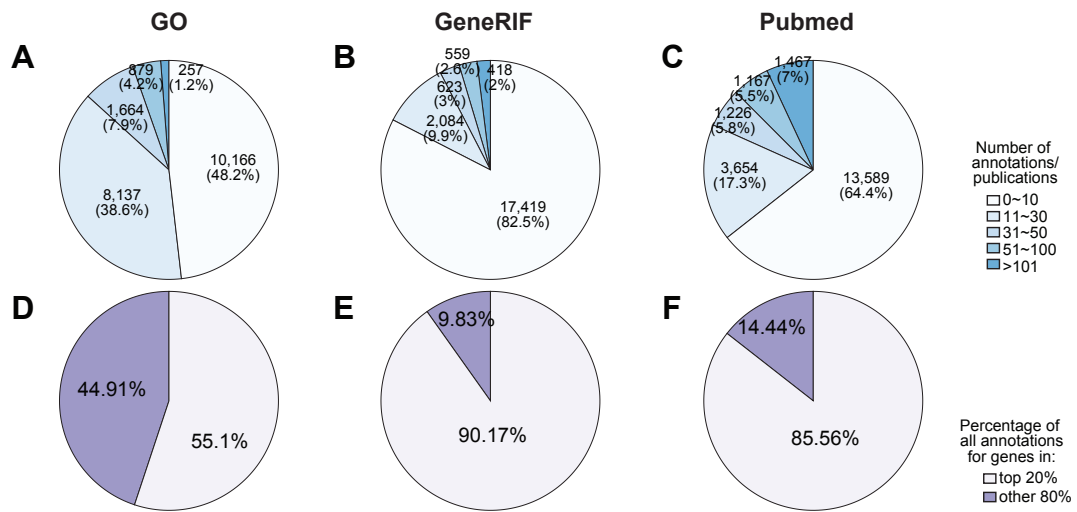

# Figure S1

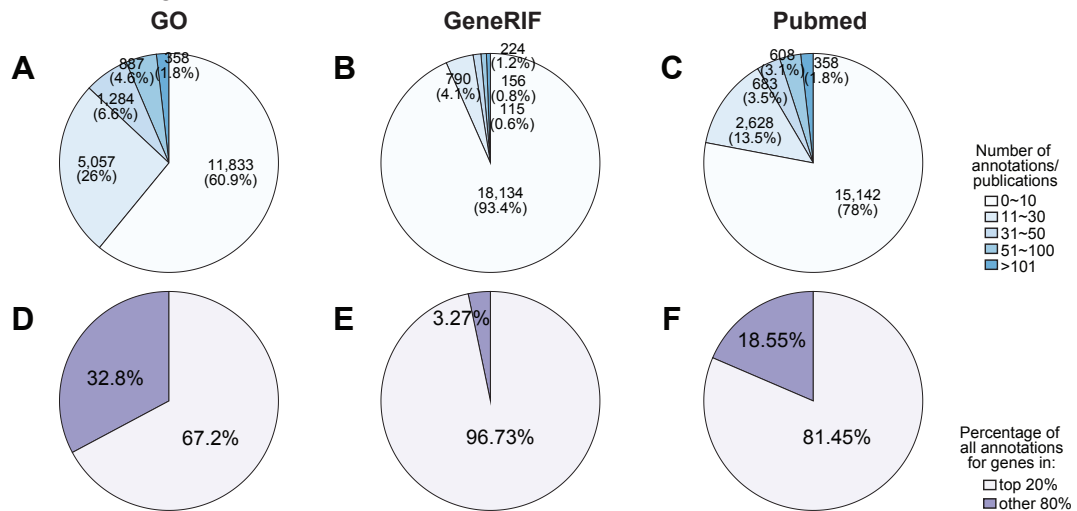

## S1-1. *Homo sapiens*

## S1-2. *Mus musculus*

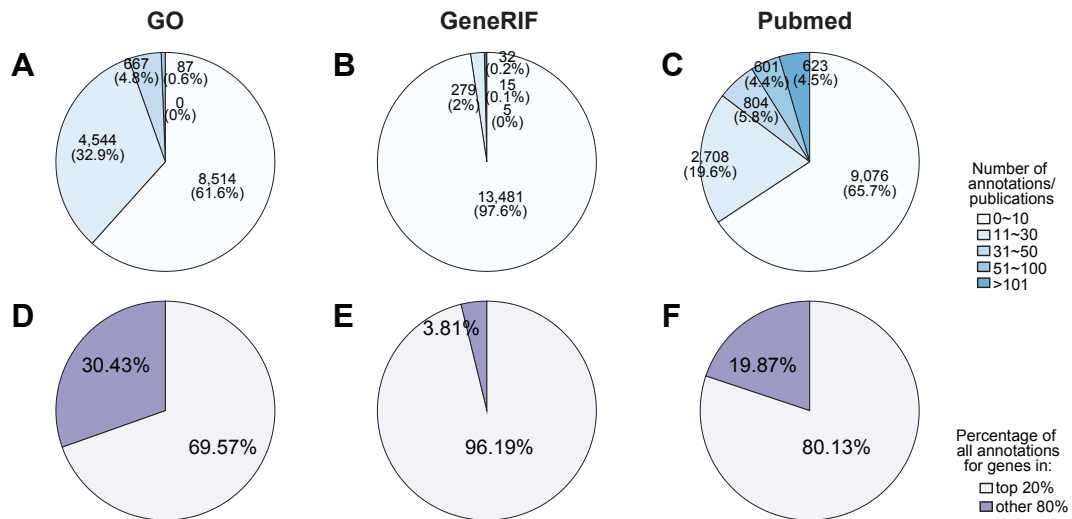

## S1-3. *Rattus norvegicus*

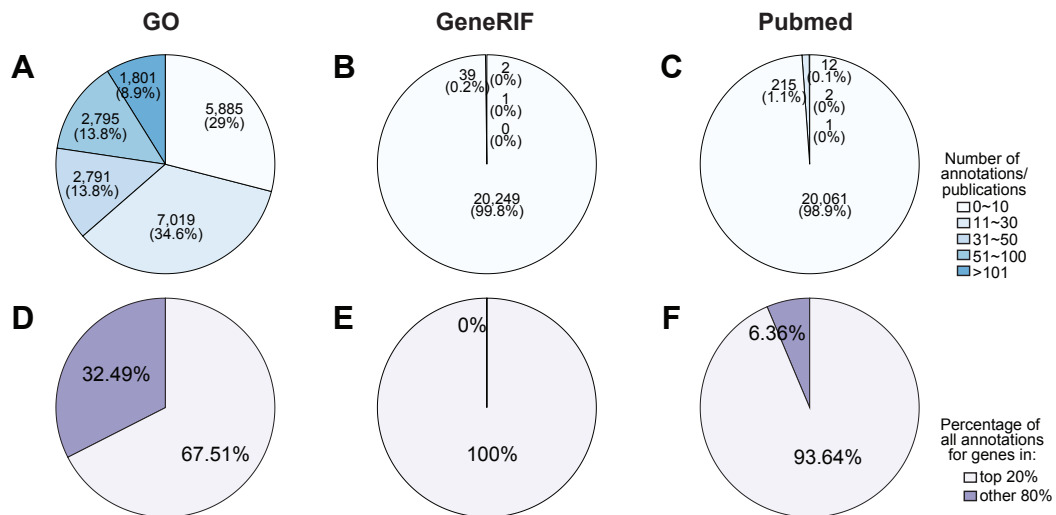

# Figure S1

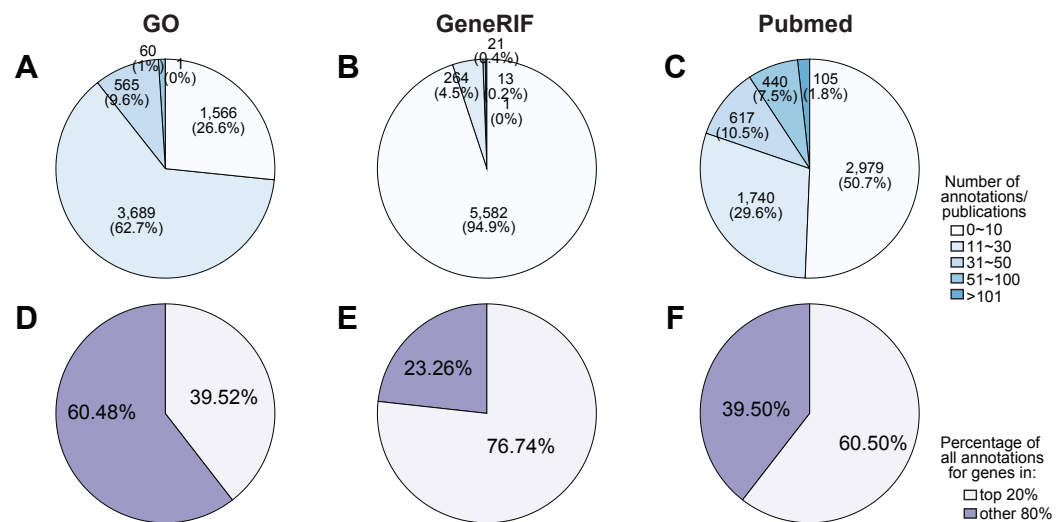

## S1-4. *Drosophila melanogaster*

## S1-5. *Caenorhabditis elegans*

## S1-6. *Saccharomyces cerevisiae*

**Figure S1. Statistical summary of available annotations for genes in *H. sapiens* (S1-1), *M. musculus* (S1-2), *R. norvegicus* (S1-3), *D. melanogaster* (S1-4), *C. elegans* (S1-5), and *S. cerevisiae* (S1-6).**

The number of annotations per gene in GO (A), GeneRIF (B), and number of publications in PubMed (C). The percentage of all annotations/publications covering the top 20% most annotated genes in respective species (D, E, F). The top 10 genes with the most annotations/publications in GO (G), GeneRIF (H), and PubMed (I) are rank ordered.
