

S3: Slopes, intercepts, and statistics of the decadal linear models of $\delta^{13}\text{C}$ in ocean dissolved CO_2 , dissolved inorganic carbon (DIC), $\text{POC}_{\text{water}}$, POC_{ice} and arctic marine mammal tissues; DF = degrees of freedom; Lines in bold are considered significant ($p < 0.005$).

	Slope		Intercept		Linear model			
	slope	SD	p-value	Intercept	SD	p-value	R ² (%)	F-statistic (DF)
POC_{water}								
Beaufort sea	-0.117	-0.033	<0.005	207.7	67.1	<0.005	21.1	12.22 (41)
European Arctic	-0.499	0.265	0.076	974.2	530.7	0.08	42.9	3.5 (18)
Arctic basins								
Bering sea	-0.256	-0.057	<0.005	486.4	114.3	<0.005	19.2	20.2 (85)
Chukchi sea	-0.019	0.046	0.679	14.7	92.9	0.875	0.29	0.19 (60)
All data	-0.149	0.028	<0.005	273.0	55.2	<0.005	9.4	29.3 (311)
POC_{ice}								
All data	-0.185	0.106	0.084	350.5	211.9	0.103	2.9	3.1 (69)
DIC								
All data	-0.011	0.001	<0.005	22.8	2.5	<0.005	5.1	72.9 (1333)
CO₂								
All data	-0.011	0.002	<0.005	12.1	4.9	0.013	1.5	20 (1333)
Marine mammals								
Northern fur seal - Bering sea/Gulf of Alaska	-0.020	0.003	<0.005	23.9	6.5	<0.005	49.2	36.8 (38)
Ringed seal - East Greenland	-0.046	0.012	<0.005	74.7	23.4	<0.005	31.3	15.5 (34)
Beluga whale -Hudson Bay	-0.026	0.003	<0.005	36.6	6.7	<0.005	57.9	60.1 (38)
Beluga whale – Baffin Bay	-0.021	0.006	<0.005	25.7	11.8	0.040	30.8	12 (24)
Bowhead whale – Bering sea/Chukchi sea	-0.064	0.007	<0.005	104.2	13.6	<0.005	72.3	80.7 (32)
