SUPPLEMENTAL INFORMATION

FIGURE LEGENDS

Supplemental Figure-1. Principal components plot of BioVU EAs with reference population before pruning outliers. AFR-African; AMR-Ad Mixed American; EAS-East Asian; SAS-South Asian; EUR-European.

Supplemental Figure-2. Principal components plot of BioVU EAs with reference population after pruning outliers. AFR-African; AMR-Ad Mixed American; EAS-East Asian; SAS-South Asian; EUR-European.

Supplemental Figure-3. Estimated SNP- based heritability of each chromosome by chromosome length in Mb with sections of chromosome 8 removed. To help all models converge, the model used to produce this figure adjusted for age, BMI, and 7 PCs with a prevalence estimate at 70%.

Supplemental Table 1. Heritability estimates for fibroid risk using European Americans within BioVU.

Heritability Estimate \pm (Std. Err.)	P-value	PC Adjustments
0.38 \pm (0.18)	0.013 ^a	0
0.34 \pm (0.18)	0.031 ^a	1
0.35 \pm (0.18)	0.027 ^a	2
0.33 \pm (0.18)	0.037 ^a	3
0.33 \pm (0.18)	0.038 ^a	4
0.33 \pm (0.18)	0.040 ^a	5
0.33 \pm (0.18)	0.040 ^a	6
0.29 \pm (0.18)	0.064	7
0.29 \pm (0.18)	0.058	8
0.30 \pm (0.18)	0.053	9
0.30 \pm (0.18)	0.056	10

Model: Adjusted for age and BMI and noted PC number in table.

SNPs are limited to $\geq 5\%$ MAF.

Prevalence estimates of fibroids are set at 70%.

^aStatistically significant

Supplemental Table 2. Heritability estimates for largest fibroid dimension using European Americans within BioVU.

Heritability Estimate \pm (Std. Err.)	P-value	PC Adjustments
0.34 \pm (0.47)	0.246	0
0.40 \pm (0.47)	0.209	1
0.40 \pm (0.47)	0.209	2
0.40 \pm (0.47)	0.209	3
0.39 \pm (0.47)	0.212	4
0.35 \pm (0.47)	0.238	5
0.36 \pm (0.48)	0.233	6
0.38 \pm (0.48)	0.224	7
0.39 \pm (0.48)	0.214	8
0.43 \pm (0.48)	0.195	9
0.44 \pm (0.48)	0.190	10

Model: Adjusted for age and BMI and noted PC number in table.
 SNPs are limited to $\geq 5\%$ MAF.

Supplemental Table 3. Heritability estimates for largest fibroid volume using European Americans within BioVU.

Heritability Estimate \pm (Std. Err.)	P-value	PC Adjustments
0.12 \pm (0.65)	0.426	0
0.18 \pm (0.65)	0.391	1
0.18 \pm (0.65)	0.389	2
0.12 \pm (0.66)	0.427	3
0.13 \pm (0.66)	0.423	4
0.14 \pm (0.66)	0.417	5
0.16 \pm (0.65)	0.404	6
0.17 \pm (0.67)	0.399	7
0.24 \pm (0.67)	0.355	8
0.28 \pm (0.67)	0.334	9
0.35 \pm (0.67)	0.300	10

Model: Adjusted for age and BMI and noted PC number in table.
 SNPs are limited to $\geq 5\%$ MAF.

Supplemental Table 4. Heritability estimates of fibroid risk with suggestive to significant regions of the genome removed from prior studies.

Studies	Heritability Estimate \pm (Std. Err.)
No Studies	0.33 \pm (0.18)
1	0.33 \pm (0.18)
2	0.33 \pm (0.18)
All Studies	0.34 \pm (0.18)

Model: Adjusted for age, BMI, and 5 PCs.

SNPs are limited to $\geq 5\%$ MAF.

Prevalence estimates of fibroids are set at 70%.

Supplemental Table 5. Final sample size and SNP count for each outcome.

Outcome	Sample Size	Post QC SNP Number - MAF 5% ^a
Fibroid Risk		4,500,362
Case	1,042	
Control	1,067	
Volume	373	4,522,829
Max Dimension	551	4,518,340

^aPost QC SNP Numbers - These are slightly different between studies because we removed SNPs out of HWE at the end for each outcome independently.

Supplemental Table 6. Heritability estimates for fibroid risk using European Americans within BioVU.

Heritability Estimate \pm (Std. Err.)	P-value	Prevalence
0.24 \pm (0.13)	0.040 ^a	0.10
0.29 \pm (0.16)	0.040 ^a	0.20
0.33 \pm (0.18)	0.040 ^a	0.30
0.35 \pm (0.19)	0.040 ^a	0.40
0.35 \pm (0.20)	0.040 ^a	0.50
0.35 \pm (0.19)	0.040 ^a	0.60
0.33 \pm (0.18)	0.040 ^a	0.70
0.29 \pm (0.16)	0.040 ^a	0.80
0.24 \pm (0.13)	0.040 ^a	0.90

Model: Adjusted for age, BMI, and 5 PCs.

SNPs are limited to $\geq 5\%$ MAF.
