## Multimedia Appendix: PGHD tools and their functionalities

## Identified PGHD hardware types and associated devices

Hardware		Devices
1.	non-health related products that are mostly well-	Laptop, PC, tablet, mobile phone,
	integrated into daily living (n= 157/183, 86%)	personal digital assistant, web cam
2.	health-related devices that are less societally	Heart rate monitor, pedometer, physical
	penetrated (n=90/183, 49%)	activity trackers, Bluetooth-enabled scale,
		smart clothing, Carbon Monoxide meter,
		sleep monitor, energy monitor
3.	medical devices (n=15/183, 8%)	Glucometer, digital blood pressure
		monitor

## Most commonly addressed functionalities of electronic PGHD-Tools

PGHD-Tool functions	Number of studies reporting functionality
Enable manual PGHD collection	n= 143
Providing additional intervention components	n= 138
PGHD analysis and visualization	n= 118
Provide feedback	n= 107
Enable data transfer and sharing	n= 94
Automatic PGHD recording	n= 89
Store PGHD	n= 78
Enable interactions and social support	n= 67
