

S6 Fig. Maximum impedance of endothelial cell (EC) monolayers at different passages. The measurements were done 144h after seeding primary ECs at P0 and 72h for ECs at P1-P3. The results are expressed as whiskers plots of 4 separate experiments with max, median and min values ($n \geq 4$). Nonparametric Man-Whitney test: * P-value < 0.05 *** P-value ≤ 0.001
