

Figure S1. CSS curves for patients with ES-SCLC between RT and non-RT groups based on three metastasis sites. The CSS curve for patients with (A) bone + brain + liver metastasis: ($P=0.095$), (B) bone + brain + lung metastasis ($P=0.001$), (C) bone + liver + lung metastasis ($P=0.042$) and (D) patients with brain + liver + lung metastasis ($P=0.217$). CSS, cancer-specific survival; ES-SCLC, extensive stage small cell lung cancer; RT, radiotherapy.
