

Figure S5A. Analysis of inflammatory markers in plasma of HFD mice (A-C) Plasma Luminex of pro- and anti-inflammatory cytokines. **(D)** Plasma Luminex of macrophage inflammatory cytokines and chemokines. Data represented as HFD (n=14 and 15/group) with mean \pm SEM. * = $P < 0.05$, ** = $P < 0.01$

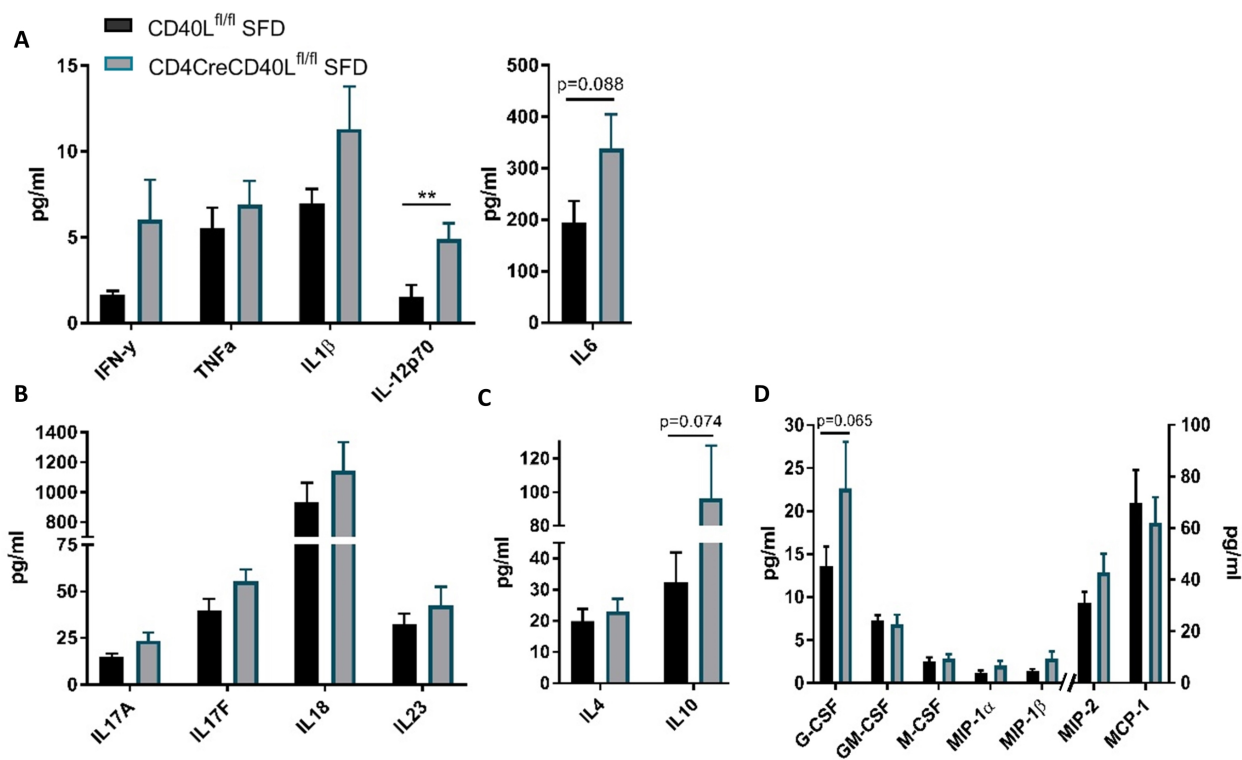

Figure S5B. Analysis of inflammatory markers in plasma of SFD mice (A-C) Plasma Luminex of pro- and anti-inflammatory cytokines. **(D)** Plasma Luminex of macrophage inflammatory cytokines and chemokines. Data represented as SFD (n=8/group) with mean \pm SEM. * = $P < 0.05$, ** = $P < 0.01$
