

Figure S3. Related to Figure 3. Top1-C with Top1 promote fork pausing (A-B) 2D gels (A) and 1D gels (B) of the *Bgl* II digested DNA isolated from asynchronous cell cultures and probed with rDNA rRFB probe. (C) Mcm4-MYC ChIP-qPCR in the asynchronous cultures of the strains of indicated genotypes for two tRNA genes. *top1-kd* – catalytically dead Top1 (*top1-Y727F*). Values plotted and statistics as in Figure 1.
