

Figure S5

Distribution relative of *N*-glycans in C2C12-sh-Mock and C2C12-sh-C12 cells. Parts of each type of *N*-glycans identified by MS/MS spectrometry are given for proliferating myoblasts (P), and at 120 hours of differentiation for myotubes (MT), and the mix of reserve cells (RC) and myoblasts (MB) for C2C12-sh-Mock and C2C12-sh-C12 cells.
