

**Figure S1.** The 20 institutes participating in the nationwide preterm care tertiary hospital KOrean Preterm collaboratE Network (KOPEN) registry.

**A**

Variables	Select Item (Click)	Points
Pelvic falldown sensation	No	54
Regular physical activity	No	40
Feeling of uterine contraction or uterine tightening	No	40
Maternal weight change rate	<30	23
History of circlage	No	0
Varginal bleeding	No	0
CRP	<0.5	0
Pregnancy disease history	No	0
Evaluation of sleep quality	Normal	0
WBC	<10	0
Drinking	No	0
Gestational age at admission (week)	>27	0
Rupture of amniotic membrane	No	0
Multiple pregnancy	Single	0
<b>Total Points</b>		<b>157</b>
<b>Probability of Risk</b>		<b>0.035</b>

**B**

Variables	Select Item (Click)	Points
Gestational age at admission (week)	>27	0
Regular physical activity	No	40
WBC	<10	0
Varginal bleeding	No	0
Rupture of amniotic membrane	No	0
Multiple pregnancy	Single	0
<b>Total Points</b>		<b>40</b>
<b>Probability of Risk</b>		<b>0.373</b>

**Figure S2.** An example of the Excel spreadsheet-based risk predictor for individual probability of preterm birth. (A) First, identify if the mother is undergoing preterm delivery before completion of 32 weeks of gestation; if not, move to (B) estimate the probability of preterm delivery between 32 and 37 weeks of gestation.
