

Laminae Segmentation

1. Segment hippocampal laminae based on VGLUT1 staining.

Subfield Refinement

2. Refine CA1 & CA2/3 hippocampal subfields based on WFS1 staining.

A $\beta$  Plaque Mask Creation

3. Create mask for A $\beta$  plaques based on 6E10 staining.

A $\beta$  Plaque Quantification

4. Combine ROIs for layers and subfields with mask for amyloid plaques and quantify plaque load.
