

**Figure 1.** ChAdOx1 Chik and ChAdOx1 Chik  $\Delta$ Cap vaccines induce neutralizing antibody titers comparable to those induced by 181/25. PRNT titers on day 25 post vaccination. Horizontal dashed line represents the limit of detection (LOD) of the assay of 20. All values recorded as 10 had neutralization values <LOD. Reciprocal PRNT titers representing 50% neutralization (PRNT<sub>50</sub>). Dots represent titers for each animal, bars represent mean and SEM. One-way ANOVA with Dunnett's (vs PBS); \* $p < 0.05$ , \*\* $p < 0.01$ .
