Figure S1. Effects of endocytic inhibitors on the uptake of block-iT/CTS 340K (BiT/CTS) polyplexes by BMDCs. After pre-treatment of genistein (200 μ M), chlorpromazine (10 μ M), sucrose (450mM), amiloride (1mM) in media for 30 minutes, BiT/CTS polyplexes were then added for 4 hours. Then the cells were washed for flow cytometry. Data shown as mean \pm SEM, n = 3.
