

Table S2. Vasomotor related outcomes measured by diary

Diary measures (as defined in each paper)	n
Frequency of HF	28
Frequency of HF/NS	19
Frequency of moderate to severe HF	7
Frequency of moderate to severe HF/NS	4
Number of HF	28
Number of HF/NS	6
Number of moderate to severe HF	9
Number of moderate to severe HF/NS	10
Severity of HF	13
Severity of HF/NS	10
Severity of moderate to severe HF	5
Severity of moderate to severe HF/NS	6
Intensity of HF	5
Intensity of HF/NS	2
Incidence of HF	1
Bothersomeness of HF/NS	5
HF (composite/severity) score	34
A 40%-75% reduction in HF	8
Frequency of awakenings resulting from nocturnal vasomotor symptoms	1
More than 50% patients halved the distress from HF/NS	1
Moderate to severe rate of HF	1
Percentage of HF reported	1
Proportion of women responding to treatment	1
Number of Vasomotor complaints	1
The percentage change in HF score	1

* Expression of the primary outcomes as quoted in each study

Abbreviations: Hot flushes (HF), night sweats (NS)
