Supplement 2: Search Strategy for Each Database

Note: Ns for each search include duplicates across searches.

For initial search on June 23, 2017

PubMed
Creating in advanced search using all fields
N=101
(((("social cognitive theory") OR "self efficacy") OR "self-efficacy")) AND ((((("common sense model") OR "illness perception*") OR "illness representation*") OR "illness belief*") OR "treatment representation*")

Medline
Advanced Search, map to subject heading unchecked
N=111
(("social cognitive theory" or "self efficacy" or "self-efficacy") and ("common sense model" or "illness perception*" or "illness representation*" or "illness belief*" or "treatment representation*")).mp.

PsycInfo
Advanced Search, map to subject heading unchecked
N=126
(("social cognitive theory" or "self efficacy" or "self-efficacy") and ("common sense model" or "illness perception*" or "illness representation*" or "illness belief*" or "treatment representation*")).mp.

CINAHL
Using advanced search, all text
N=67
TX (((("social cognitive theory") OR "self efficacy") OR "self-efficacy")) AND ((((("common sense model") OR "illness perception*") OR "illness representation*") OR "illness belief*") OR "treatment representation*")

Web of Science
Entered into basic search
N=120
TOPIC: ((((("social cognitive theory") OR "self efficacy") OR "self-efficacy")) AND ((((("common sense model") OR "illness perception*") OR "illness representation*") OR "illness belief*") OR "treatment representation*")) Timespan: All years. Indexes: SCI-EXPANDED.

For updated search on April 10, 2019

PubMed
Creating in advanced search using all fields
N=19
(((("social cognitive theory") OR "self efficacy") OR "self-efficacy")) AND ((((("common sense model") OR "illness perception*") OR "illness representation*") OR "illness belief*") OR "treatment representation*") Limited to 6/23/17 to present.

Medline
Advanced Search, map to subject heading unchecked
N=22
(("social cognitive theory" or "self efficacy" or "self-efficacy") and ("common sense model" or "illness perception*" or "illness representation*" or "illness belief*" or "treatment representation*")).mp. Limited to 2017-current

PsycInfo
Advanced Search, map to subject heading unchecked
N=24
(("social cognitive theory" or "self efficacy" or "self-efficacy") and ("common sense model" or "illness perception*" or "illness representation*" or "illness belief*" or "treatment representation*")).mp. Limited to 2017-current

CINAHL Using advanced search, all text
N=22
TX (((("social cognitive theory") OR "self efficacy") OR "self-efficacy")) AND ((((("common sense model") OR "illness perception*") OR "illness representation*") OR "illness belief*") OR "treatment representation*") Limited to June 2017 – April 2019

Web of Science
Entered into basic search
N=32
TOPIC: ((((("social cognitive theory") OR "self efficacy") OR "self-efficacy")) AND ((((("common sense model") OR "illness perception*") OR "illness representation*") OR "illness belief*") OR "treatment representation*")) Timespan: All years. Indexes: SCI-EXPANDED. Limited to 2017 - 2019
