

Supplementary material 7. Paralogy in the fungal type III polyketide synthase (PKS) phylogenetic tree.

The number of type III PKS genes at the locus is indicated as in Figure 3. The type III PKS phylogenetic clades are indicated in the middle ring as shown in Figure 3. The black and red lines link type III PKS paralogues in the same species, the red lines indicating those paralogues that are located at the same locus.
