

## Implementation of the new National Cervical Screening Program in General Practice

General practitioners (GPs) play an important role in educating women about the potential benefits of participation in routine cervical screening as well as the delivery of the program. We are conducting a 10 minute survey to understand how prepared GPs feel to undertake cervical screening under the new guidelines from 1<sup>st</sup> December 2017. Your responses will help us improve resources and current systems to ensure GPs continue to contribute to the success of the National Cervical Screening Program.

Please answer as the questions or statements apply to you in your current practice this week.

## All information provided will be confidential and you will not be identifiable in any analysis or reporting of the survey.

<del></del>	
1. Your age years	2. Main practice postcode
3. Your gender (F=female; M=male)	4. Amount of time in general practice months years
5. Your role in the practice?  a. General Practitioner  b. GP registrar  c. Nurse  d. Other (specify)	6. How many hours do you work at the practice per week?  Hours
7. a. Average number of <u>female</u> patients you see in a week?  b. How many of them are <u>under 25 years</u> ?	8. Please indicate which, if any, preventive services you routinely offer to asymptomatic sexually active female patients aged less than 25 years?  a. Pap testing b. Contraceptive services c. Mental Health d. Chlamydia testing e. Other STI services f. Immunization g. HEADSS screen
9. How many Pap tests do you do in a month?	10. How confident do you currently feel discussing Pap testing with eligible women?  a. Not at all confident  b. Somewhat confident  c. Confident  d. Extremely confident
11. How confident do you currently feel discussing Pap testing with women who are reluctant to have a Pap test?  a. Not at all confident  b. Somewhat confident  c. Confident  d. Extremely confident	12. What is your main source of information about the changes to the National Cervical Screening Program in Australia? (e.g. colleagues, medical media, government communication, journals etc)  a. Colleagues  b. Medical media  c. Government communication  d. Journals  e. Other (specify)

ability to implement the following under the new cervical screening guidelines (PLEASE CIRCLE)  a. Only offering routine cervical screening to women 25 years and over  b. Screening HPV negative women every 5 years  c. Collecting only a liquid based sample (not preparing a slide)  d. Referring all HPV16/18 positive women for colposcopy regardless of their cytology result  e. Not referring other oncogenic HPV positive (non HPV16/18) women who have low grade/negative cytology for colposcopy  f. Recommending self-collection to an underscreened woman who refuse a practitioner-collected cervical sample  g. Having to wait to offer a repeat self-collection until the woman is overdue again (7 years since last screen)  14. How confident do you feel today about your ability to implement the following (PLEASE CIRCLE)  a. Recommend HPV screening to a woman  b. Explain the association between HPV and cervical cancer to a woman  c. Explain a non 16/18 (other oncogenic) HPV positive test result to a woman who will be asked to return in 5 years  f. Explain to a woman why more frequent cervical screening (i.e. every 2 years) is no longer recommended  h. Discuss the self-collection option with an eligible (under-screened) woman  i. Explain to a woman who is not eligible for self-collection why this is the case	12	How <u>comfortable</u> do you feel <u>today</u> about your	Not at all	Fairly	Slightly	Comfortable	Extremely
