

Supplementary Table 1. The Relationship between the max-CIMT and Number of Diseased Coronary Arteries

Number of coronary arteries	Sample size (n)	max-CIMT (mm)	<i>p</i>
Minimal	34	1.13±0.27	
1VD	12	1.46±0.51	0.004
2VD	13	1.33±0.28	
3VD	16	1.49±0.44	

max-CIMT, mean of maximal value of carotid intima-medial thickness of a patient; VD, vessel disease.
