

A) Upregulated genes

B) Downregulated genes

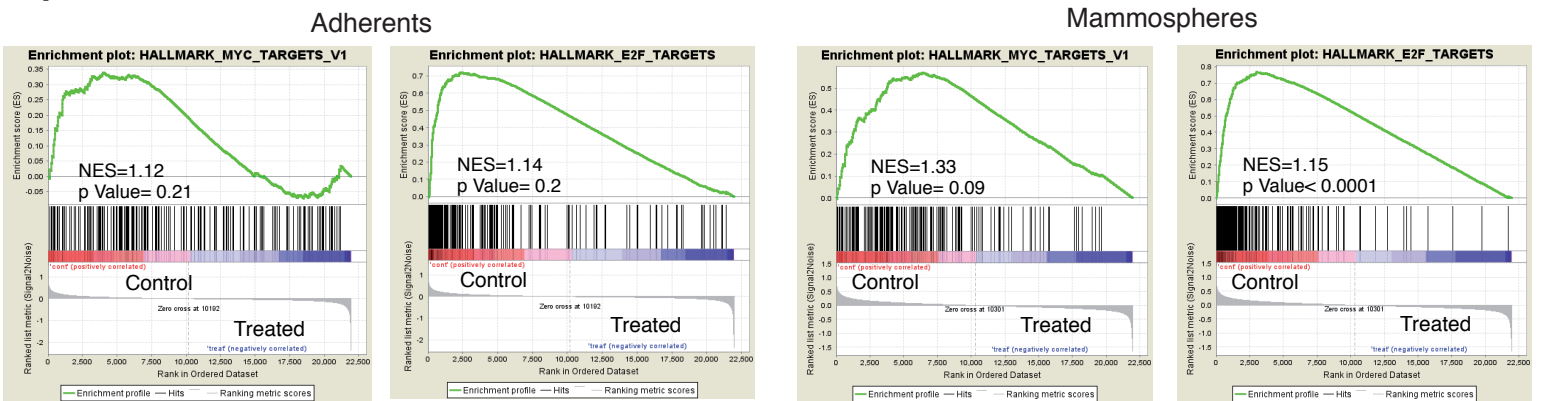

Fig.S9. GSEA of T3-regulated genes. **A)** Enrichment plots from GSEA showing the down-regulation of Hallmarks c-Myc and E2F targets in T3-treated MCF7-TR β cells grown as adherent cells or secondary mammospheres. **B)** Over-represented Hallmarks in up-regulated genes in T3-treated MCF7-TR β cells grown as adherent cells or secondary mammospheres.
