

Table S5. MSA transmission to TgM83^{+/-} mice.

Inoculation site	Incubation time (days post inoculation)	Cell infectivity ($\times 10^3$ A.U.)*
Standard freehand	166 \pm 48	66 \pm 27
Hippocampus	182 \pm 46	82 \pm 27
Thalamus	159 \pm 26	68 \pm 9.3
Hypothalamus	223 \pm 106	73 \pm 21

**Measurements made from five images per well, n = 6 wells. Phosphotungstic acid (PTA)-precipitated samples were diluted in DPBS 1:10 before testing on α -syn140*A53T-YFP cells.*
