

Table S3. Effects of ticagrelor combined with aspirin and ticagrelor combined with placebo on platelet activity evaluated with TxB₂ in 44 healthy male volunteers

	TxB ₂ (ng mL ⁻¹)	
	Ticagrelor + aspirin	Ticagrelor + placebo
Baseline	20.7 (10.4; 38.1)	16.4 (10.1; 37.5)
24 h	0.3 (0.1; 0.4)	15.5 (10.6, 22.7)
p-Value ^a	<0.0001	0.85
p-Value ^b	<0.0001	

^aFrom baseline to 24 h. ^bDifference between treatment groups in changes to 24 h. Values are given as median (quartiles) for thromboxane B₂ (TxB₂).
