

Supplemental Figure Legends

Figure 1A. Kaplan Meier Curve of all-cause mortality. (p=0.186)

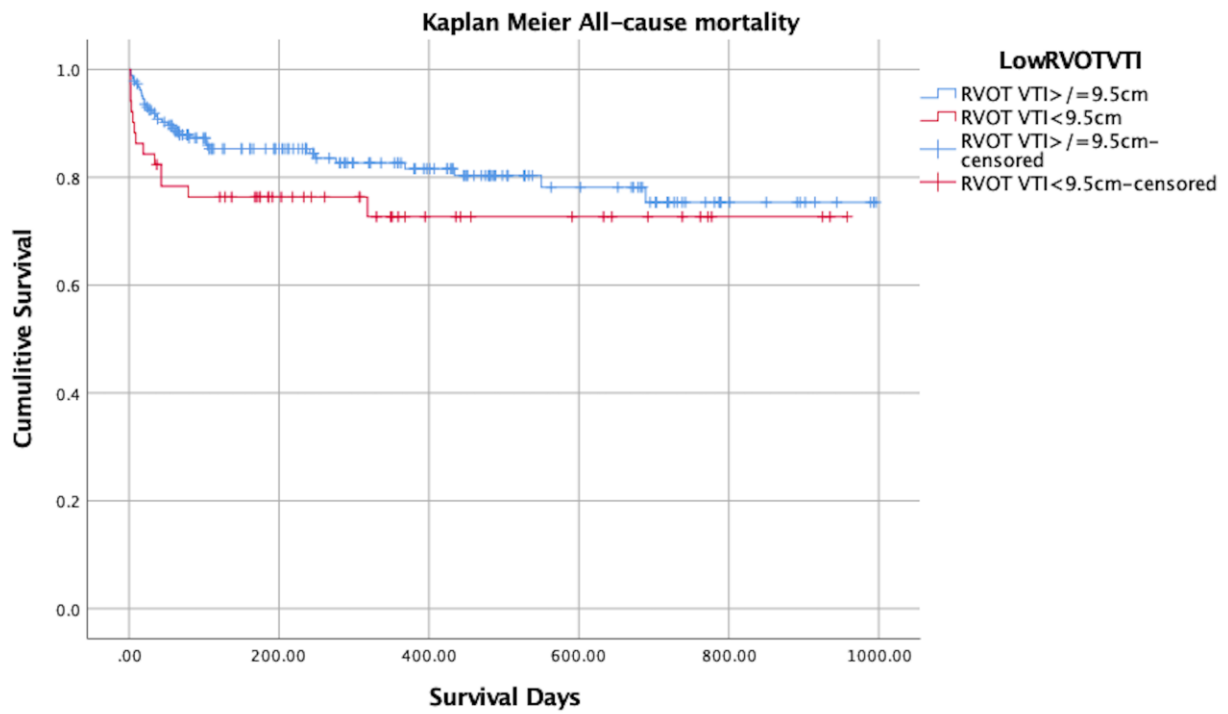

Figure 2A: RVOT VTI distribution among the PE severity subgroups. Low Risk, Intermediate Risk, High Risk

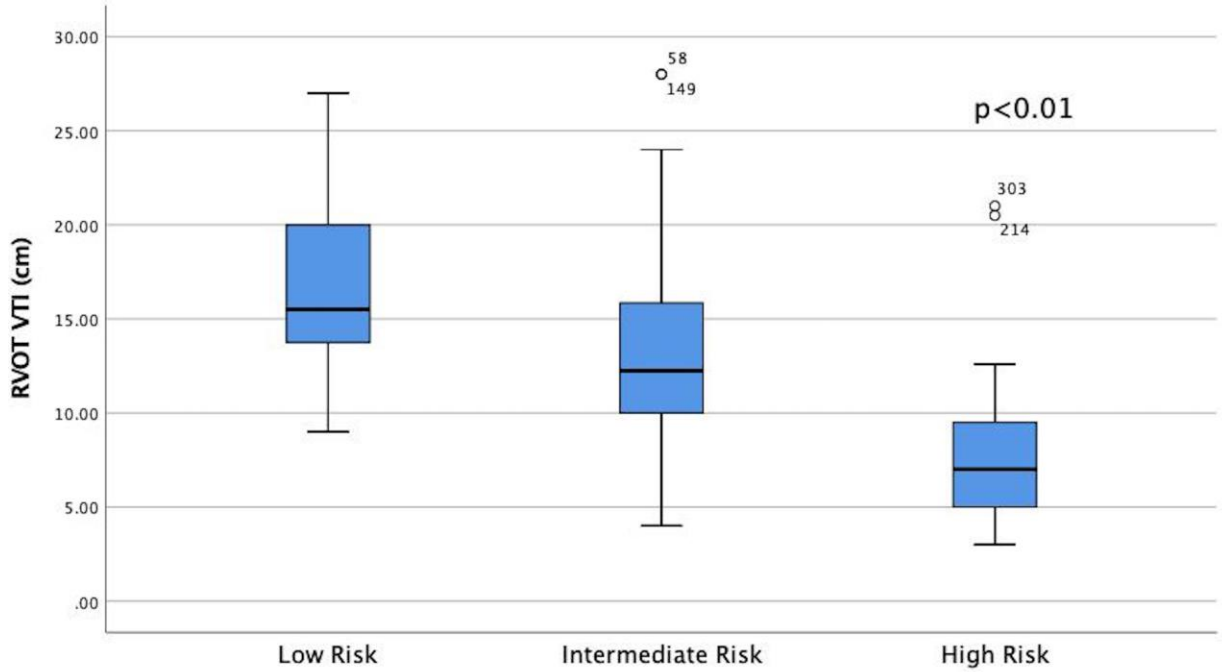

Figure 3A.

Receiver Operating Characteristic (ROC) curve for LVOT VTI for the diagnosis of low cardiac index ($CI < 2.2 \text{ L/min/m}^2$). Area under the curve (AUC) is 0.73 (95% CI 0.6-0.9), $p=0.02$, Cut off LVOT VTI of 18.3cm provides sensitivity of 50% and specificity 88%.
