

Supplementary Materials: Utilizing Liposomal Quercetin and Gallic Acid in Localized Treatment of Vaginal *Candida* Infections

Barbara Giordani, Purusotam Basnet, Ekaterina Mishchenko, Barbara Luppi and Nataša Škalko-Basnet

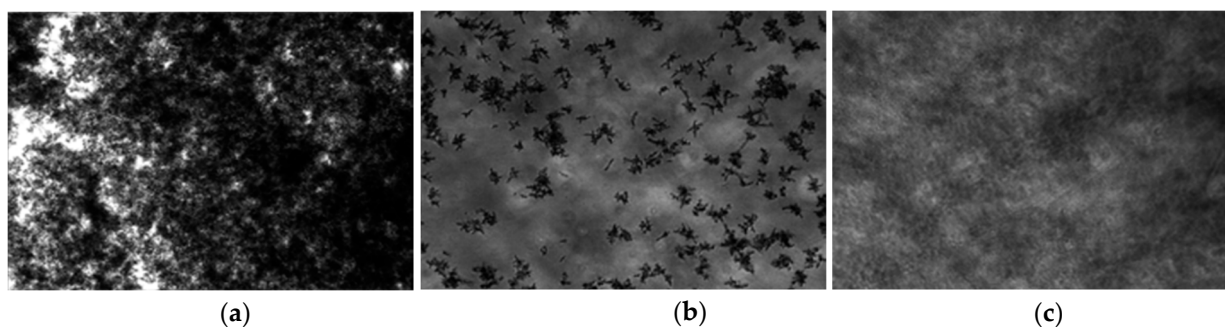

Figure S1. Microscopic determination of anti-*Candida* activity. Pictures of (a) *Candida* control (not treated cells); (b) *Candida* cells treated with GA 31 $\mu\text{g}/\text{mL}$ and (c) *Candida* cell treated with GA 125 $\mu\text{g}/\text{mL}$ were obtained using Axiovert 40 Inverted Microscope (20 \times).
